FOR IMMEDIATE RELEASE

SCIENCEBLOGS JOINS USA SCIENCE & ENGINEERING FESTIVAL AS OFFICIAL BLOGGING PARTNER

NEW YORK (February 16) — ScienceBlogs today announced that it has proudly teamed up with the USA Science & Engineering Festival as the Official Blogging Partner.

The Inaugural USA Science & Engineering Festival, the country's first national science festival, will descend on the Washington, DC area in the fall of 2010. The Festival promises to be the ultimate multi-cultural, multi-generational and multi-disciplinary celebration of science in the United States. The Festival culminates in a two-day Expo (October 23-24) in the nation's capital, where 500 science and engineering organizations from all over the country will present hands-on, fun science activities to inspire the next generation of scientists and engineers.

Beginning today, ScienceBlogs is hosting the Official Festival Blog where organizers and presenters will be sharing their thoughts and exploring the themes and ideas that are shaping the festival agenda (scienceblogs.com/usasciencefestival). ScienceBloggers will also be on location in Washington, DC, live-blogging the Expo and engaging SB readers across the country and around the world, and contributing to various events.

About ScienceBlogs

ScienceBlogs.com is the leading social media site in the science and technology category, with more than 130 acclaimed blogs, 11 content channels, a jobs platform and a fast-growing audience of 2.4 million unique visitors a month. ScienceBlogs recently formed a strategic partnership with National Geographic Digital Media spanning content, technology, and advertising sales. Outside the US, ScienceBlogs hosts sites in Germany (ScienceBlogs.de) and Brazil (ScienceBlogs.com.br).
